EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. C. Jablon on 5/23/06.

The application has been amended as follows:

In the Title:

After "Decoder," --for Determining Interframe Motion-- has been inserted.

In the Claims:

Claim 1, line 18, "said" has been deleted.

2. The following is an examiner's statement of reasons for allowance: Claims 1 and 2 are considered allowable over the prior art because none of the references of record alone or in combination suggest, disclose, or teach an image signal decoder comprising a variable length decoding section; an interframe motion determination section for storing motion vector information, and determining a magnitude of an interframe motion based on a distribution of the motion vector information, when determining that the interframe motion is larger than a predetermined level, suspend the decoding; an inverse quantization section; an inverse DCT; a motion compensation section; and a frame buffer all together as claimed. The closest prior art, Kurobe et al (EP 0 935 396

A2) discloses a conventional image signal decoder, either singularly or in combination, fails to anticipate or render the above limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Y. Lee whose telephone number is (571) 272-7334. The examiner can normally be reached on (571) 272-7334.
